^a The Fund's fiscal year-end was changed from April 30 to March 31.

See notes to financial statements.

b Based on average shares outstanding throughout each period.

^c The amounts reported for a share outstanding may not accord with the change in aggregate gains and losses in securities for the fiscal period due to the timing of capital share transactions in relation to the fluctuating market values of the Fund's underlying securities.

d Not annualized

^e Annualized for periods of less than one year.

Portfolio turnover rates exclude portfolio securities received or delivered as a result of processing capital share transactions in Creation Units.

Notes to Financial Statements (Unaudited)

iSHARES® TRUST

iShares Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an openend management investment company. The Trust was established as a Delaware statutory trust pursuant to an Agreement and Declaration of Trust dated December 16, 1999.

These financial statements relate only to the following funds (each, a "Fund," and collectively, the "Funds"):

iShares ETF ^a	Diversification Classification	iShares ETF ^a	Diversification Classification
U.S. Aerospace & Defense	Non-diversified	U.S. Oil & Gas Exploration & Production	Non-diversified
U.S. Broker-Dealers	Non-diversified	U.S. Oil Equipment & Services	Non-diversified
U.S. Healthcare Providers	Non-diversified	U.S. Pharmaceuticals	Non-diversified
U.S. Home Construction	Non-diversified	U.S. Real Estate ETF	Diversified
U.S. Insurance	Non-diversified	U.S. Regional Banks	Non-diversified
U.S. Medical Devices	Non-diversified	U.S. Telecommunications ETF	Non-diversified

^a The Funds' fiscal year-end was changed from April 30 to March 31.

The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index. The investment adviser uses a "passive" or index approach to try to achieve each Fund's investment objective.

Pursuant to the Trust's organizational documents, the Funds' officers and trustees are indemnified against certain liabilities that may arise out of the performance of their duties to the Funds. Additionally, in the normal course of business, the Funds enter into contracts with service providers that contain general indemnification clauses. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

1. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies are consistently followed by the Funds in the preparation of their financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Each Fund is considered an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies.

SECURITY VALUATION

Each Fund's investments are valued at fair value each day that the Fund's listing exchange is open and, for financial reporting purposes, as of the report date should the reporting period end on a day that the Fund's listing exchange is not open. U.S. GAAP defines fair value as the price a fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The BlackRock Global Valuation Methodologies Committee (the "Global Valuation Committee") provides oversight of the valuation of investments for the Funds. The investments of each Fund are valued pursuant

iSHARES® TRUST

to policies and procedures developed by the Global Valuation Committee and approved by the Board of Trustees of the Trust (the "Board").

- Equity investments traded on a recognized securities exchange are valued at that day's last reported trade price or the official closing price, as applicable, on the exchange where the stock is primarily traded. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last traded price.
- Open-end U.S. mutual funds are valued at that day's published net asset value ("NAV").

In the event that application of these methods of valuation results in a price for an investment which is deemed not to be representative of the fair value of such investment or if a price is not available, the investment will be valued based upon other available factors deemed relevant by the Global Valuation Committee, in accordance with policies approved by the Board. These factors include but are not limited to (i) attributes specific to the investment; (ii) the principal market for the investment; (iii) the customary participants in the principal market for the investment; (iv) data assumptions by market participants for the investment, if reasonably available; (v) quoted prices for similar investments in active markets; and (vi) other factors, such as future cash flows, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and/or default rates. Valuations based on such factors are reported to the Board on a quarterly basis.

The Global Valuation Committee employs various methods for calibrating valuation approaches for investments where an active market does not exist, including regular due diligence of the Trust's pricing vendors, a regular review of key inputs and assumptions, transactional back-testing or disposition analysis to compare unrealized gains and losses to realized gains and losses, reviews of missing or stale prices, reviews of large movements in market values, and reviews of market related activity.

Fair value pricing could result in a difference between the prices used to calculate a Fund's NAV and the prices used by the Fund's underlying index, which in turn could result in a difference between the Fund's performance and the performance of the Fund's underlying index.

Various inputs are used in determining the fair value of financial instruments. Inputs may be based on independent market data ("observable inputs") or they may be internally developed ("unobservable inputs"). These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial reporting purposes. The level of a value determined for a financial instrument within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement in its entirety. The categorization of a value determined for a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and is not necessarily an indication of the risk associated with investing in the instrument. The three levels of the fair value hierarchy are as follows:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly
 or indirectly, including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar
 assets or liabilities in markets that are not considered to be active, inputs other than quoted prices that are observable for
 the asset or liability (such as exchange rates, financing terms, interest rates, yield curves, volatilities, prepayment speeds,
 loss severities, credit risks and default rates) or other market-corroborated inputs; and
- Level 3 Unobservable inputs for the asset or liability, including the Global Valuation Committee's assumptions used in determining the fair value of investments.

iSHARES® TRUST

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. In accordance with the Trust's policy, transfers between different levels of the fair value hierarchy are deemed to have occurred as of the beginning of the reporting period.

The following table summarizes the value of each of the Funds' investments according to the fair value hierarchy as of September 30, 2015. The breakdown of each Fund's investments into major categories is disclosed in its respective schedule of investments.

SECURITY TRANSACTIONS AND INCOME RECOGNITION

Security transactions are accounted for on trade date. Dividend income and capital gain distributions, if any, are recognized on the ex-dividend date, net of any foreign taxes withheld at source. Any taxes withheld that are reclaimable from foreign tax authorities as of September 30, 2015 are reflected in dividends receivable. Non-cash dividends received in the form of stock in an elective dividend, if any, are recorded as dividend income at fair value. Distributions received by the Funds may include a return of capital that is estimated by management. Such amounts are recorded as a reduction of the cost of investments or reclassified to capital gains. Interest income is accrued daily. Realized gains and losses on investment transactions are determined using the specific identification method.

DISTRIBUTIONS TO SHAREHOLDERS

Dividends and distributions paid by each Fund are recorded on the ex-dividend dates. Distributions are determined on a tax basis and may differ from net investment income and net realized capital gains for financial reporting purposes. Dividends and distributions are paid in U.S. dollars and cannot be automatically reinvested in additional shares of the Funds.

LOANS OF PORTFOLIO SECURITIES

Each Fund may lend its investment securities to approved borrowers, such as brokers, dealers and other financial institutions. The borrower pledges and maintains with the Fund collateral consisting of cash, an irrevocable letter of credit issued by a bank, or securities issued or guaranteed by the U.S. government. The initial collateral received by each Fund is required to have a value of at least 102% of the current value of the loaned securities for securities traded on U.S. exchanges and a value of at least 105% for all other securities. The collateral is maintained thereafter at a value equal to at least 100% of the current value of the securities on loan. The market value of the loaned securities is determined at the close of each business day of the Funds. Any additional required collateral is delivered to the Funds and any excess collateral is returned by the Funds on the next business day. During the term of the loan, each Fund is entitled to all distributions made on or in respect of the loaned securities. Loans of securities are terminable at any time and the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions.

Any cash received as collateral for securities on loan may be reinvested in certain short-term instruments either directly on behalf of a fund or through one or more joint accounts or money market funds, including those managed by BlackRock Fund Advisors ("BFA"), the Funds' investment adviser, or its affiliates. As of September 30, 2015, any securities on loan were collateralized by cash. The cash collateral received was invested in money market funds managed by BFA and is disclosed in the schedules of investments. The securities on loan for each Fund are also disclosed in its schedule of investments. The total value of any securities on loan as of September 30, 2015 and the total value of the related collateral are disclosed in the statements of assets and liabilities. Income earned by the Funds from securities lending is disclosed in the statements of operations.

The risks of securities lending include the risk that the borrower may not provide additional collateral when required or may not return the securities when due. To mitigate these risks, the Funds benefit from a borrower default indemnity provided by BlackRock, Inc. ("BlackRock"). BlackRock's indemnity allows for full replacement of securities lent. Each Fund could suffer a loss if the value of the investments purchased with cash collateral falls below the value of the cash collateral received.

Securities lending transactions are entered into by the Funds under Master Securities Lending Agreements ("MSLA") which provide the right, in the event of default (including bankruptcy or insolvency) for the non-defaulting party to liquidate the collateral and calculate a net exposure to the defaulting party or request additional collateral. In the event that a borrower defaults, a Fund, as lender, would offset the market value of the collateral received against the market value of the securities loaned. The value of the collateral is typically greater than that of the market value of the securities loaned, leaving the lender with a net amount payable to the defaulting party. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or

iSHARES® TRUST

prohibitions against such a right of offset in the event of an MSLA counterparty's bankruptcy or insolvency. Under the MSLA, the borrower can resell or re-pledge the loaned securities, and a Fund can reinvest cash collateral, or, upon an event of default, resell or re-pledge the collateral.

The following table is a summary of securities lending agreements which are subject to offset under an MSLA as of September 30, 2015:

^a Collateral received in excess of the market value of securities on loan is not presented for financial reporting purposes. The total collateral received is disclosed in each Fund's statement of assets and liabilities.

iSHARES® TRUST

INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Pursuant to an Investment Advisory Agreement with the Trust, BFA manages the investment of each Fund's assets. BFA is a California corporation indirectly owned by BlackRock. Under the Investment Advisory Agreement, BFA is responsible for substantially all expenses of the Funds, except interest, taxes, brokerage commissions and other expenses connected with the execution of portfolio transactions, distribution fees, litigation expenses and any extraordinary expenses.

For its investment advisory services to each Fund, BFA is entitled to an annual investment advisory fee based on each Fund's allocable portion of the aggregate of the average daily net assets of the Fund and certain other iShares funds, as follows:

Investment Advisory Fee	Aggregate Average Daily Net Assets
0.48%	First \$10 billion
0.43	Over \$10 billion, up to and including \$20 billion
0.38	Over \$20 billion, up to and including \$30 billion
0.34 ^a	Over \$30 billion, up to and including \$40 billion ^b
0.33	Over \$40 billion, up to and including \$50 billion ^b
0.31	Over \$50 billion ^b

^a Advisory fee for this breakpoint level was reduced from 0.342% to 0.34% effective July 1, 2015.

The U.S. Securities and Exchange Commission has issued an exemptive order which permits BlackRock Institutional Trust Company, N.A. ("BTC"), an affiliate of BFA, to serve as securities lending agent for the Funds, subject to applicable conditions. As securities lending agent, BTC bears all operational costs directly related to securities lending. Each Fund is responsible for fees in connection with the investment of cash collateral received for securities on loan in a money market fund managed by BFA, however, BTC has agreed to reduce the amount of securities lending income it receives in order to effectively limit the collateral investment fees each Fund bears to an annual rate of 0.04% (the "collateral investment fees"). Securities lending income is equal to the total of income earned from the reinvestment of cash collateral, net of fees and other payments to and from borrowers of securities, and less the collateral investment fees. The Funds retain a portion of securities lending income and remit the remaining portion to BTC as compensation for its services as securities lending agent.

Pursuant to a securities lending agreement, each Fund retains 71.5% of securities lending income and the amount retained can never be less than 65% of the total of securities lending income plus the collateral investment fees. In addition, commencing the business day following the date that the aggregate securities lending income plus the collateral investment fees generated across all 1940 Act iShares exchange-traded funds (the "iShares ETF Complex") in a given calendar year exceeds the aggregate securities lending income generated across the iShares ETF Complex in the calendar year 2013, each Fund, pursuant to a securities lending agreement, will retain for the remainder of that calendar year 75% of securities lending income and the amount retained can never be less than 65% of the total of securities lending income plus the collateral investment fees.

b Breakpoint level was added effective July 1, 2015.

iSHARES® TRUST

For the period ended September 30, 2015, the total of securities lending agent services and collateral investment fees paid were as follows:

	Fees Paid		Fees Paid
iCharas ETE		ich area ETE	
iShares ETF	to BTC	iShares ETF	to BTC
U.S. Aerospace & Defense	\$ 7,833	U.S. Oil & Gas Exploration & Production	\$ 118,117

U.S. Insurance	396	U.S. Regional Banks	921
U.S. Medical Devices	15,344	U.S. Telecommunications	131,221

BlackRock Investments, LLC, an affiliate of BFA, is the distributor for each Fund. Pursuant to the distribution agreement, BFA is responsible for any fees or expenses for distribution services provided to the Funds.

Cross trades for the period ended September 30, 2015, if any, were executed by the Funds pursuant to Rule 17a-7 under the 1940 Act. Cross trading is the buying or selling of portfolio securities between funds to which BFA (or an affiliate) serves as investment adviser. At its regularly scheduled quarterly meetings, the Board reviews such transactions as of the most recent calendar quarter for compliance with the requirements and restrictions set forth by Rule 17a-7.

Each Fund may invest its positive cash balances in certain money market funds managed by BFA or an affiliate. The income earned on these temporary cash investments is included in "Interest – affiliated" in the statements of operations.

The PNC Financial Services Group, Inc. is the largest stockholder of BlackRock and is considered to be an affiliate of the Funds for 1940 Act purposes.

Investments in issuers considered to be affiliates of the Funds (excluding money market funds) during the period ended September 30, 2015, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

	Shares Held			Shares Held	Value at		Net

U.S. Telecommunications	117,241,269	348,166,027

4. CAPITAL SHARE TRANSACTIONS

Capital shares are issued and redeemed by each Fund only in aggregations of a specified number of shares or multiples thereof ("Creation Units") at NAV. Except when aggregated in Creation Units, shares of each Fund are not redeemable. Transactions in capital shares for each Fund are disclosed in detail in the statements of changes in net assets.

The consideration for the purchase of Creation Units of a fund in the Trust generally consists of the in-kind deposit of a designated portfolio of securities and a specified amount of cash. Certain funds in the Trust may be offered in Creation Units solely or partially for cash in U.S. dollars. Investors purchasing and redeeming Creation Units may pay a purchase transaction fee and a redemption transaction fee directly to State Street Bank and Trust Company, the Trust's administrator, to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units, including Creation Units for cash.

iSHARES® TRUST

Investors transacting in Creation Units for cash may also pay an additional variable charge to compensate the relevant fund for certain transaction costs (i.e., stamp taxes, taxes on currency or other financial transactions, and brokerage costs) and market impact expenses relating to investing in portfolio securities. Such variable charges, if any, are included in "Proceeds from shares sold" in the statements of changes in net assets.

5. PRINCIPAL RISKS

In the normal course of business, each Fund's investment activities expose it to various types of risk associated with the financial instruments and markets in which it invests. The significant types of financial risks each Fund is exposed to include market risk and credit risk. Each Fund's prospectus provides details of these and other types of risk.

BFA uses a "passive" or index approach to try to achieve each Fund's investment objective following the securities included in its underlying index during upturns as well as downturns. BFA does not take steps to reduce market exposure or to lessen the effects of a declining market. Divergence from the underlying index and the composition of the portfolio is monitored by BFA.

MARKET RISK

Market risk arises mainly from uncertainty about future values of financial instruments influenced by price, currency and interest rate movements. It represents the potential loss each Fund may suffer through holding market positions in the face of market movements. Each Fund is exposed to market risk by virtue of its investment in equity instruments. The fair value of securities held by the Funds may decline due to general market conditions, economic trends or events that are not specifically related to the issuers of the securities including local, regional or global political, social or economic instability or to factors that affect a particular industry or group of industries. The extent of each Fund's exposure to market risk is the market value of the investments held as shown in the Fund's schedule of investments.

A diversified portfolio, where this is appropriate and consistent with a fund's objectives, minimizes the risk that a price change of a particular investment will have a material impact on the NAV of a fund. The investment concentrations within each Fund's portfolio are disclosed in its schedule of investments.

Each Fund invests all or substantially all of its assets in securities within a single or limited number of market sectors. When a fund concentrates its investments in this manner, it assumes the risk that economic, political and social conditions affecting those market sectors may have a significant impact on its investment performance.

CREDIT RISK

Credit risk is the risk that an issuer or guarantor of debt instruments or the counterparty to a financial transaction, including derivatives contracts, repurchase agreements or loans of portfolio securities, is unable or unwilling to make timely interest and/or principal payments or to otherwise honor its obligations. BFA and its affiliates manage counterparty credit risk by entering into transactions only with counterparties that they believe have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties. Financial assets, which potentially expose the Funds to issuer and counterparty credit risks, consist principally of financial instruments and receivables due from counterparties. The extent of each Fund's exposure to credit and counterparty risks with respect to those financial assets is approximated by their value recorded in its statement of assets and liabilities.

iSHARES® TRUST

6. INCOME TAX INFORMATION

Each Fund is treated as an entity separate from the Trust's other funds for federal income tax purposes. It is the policy of each Fund to qualify as a regulated investment company by complying with the provisions applicable to regulated investment companies, as defined under Subchapter M of the Internal Revenue Code of 1986, as amended, and to annually distribute substantially all of its ordinary income and any net capital gains (taking into account any capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income and excise taxes. Accordingly, no provision for federal income taxes is required.

For purposes of U.S. GAAP, in-kind redemptions are treated as sales of securities resulting in realized capital gains or losses to the Funds. Because such gains or losses are not taxable to the Funds and are not distributed to existing Fund shareholders, the gains or losses are reclassified from accumulated net realized gain (loss) to paid-in capital at the end of the Funds' tax year. These reclassifications have no effect on net assets or NAV per share.

The tax character of current year distributions will be determined at the end of the current fiscal year.

As of April 30, 2015, the Funds' most recent fiscal year-end, the following Funds had capital loss carryforwards available to offset future realized capital gains through the indicated expiration dates as follows:

	Non-	Expiring	Expiring	Expiring	Expiring

U.S. Regional Banks	533,601,077	6,305,015	(26,403,101)	(20,098,086)
U.S. Telecommunications	538,737,123	12,792,815	(89,057,165)	(76,264,350)

Management has analyzed tax laws and regulations and their application to the Funds as of September 30, 2015, inclusive of the open tax return years, and does not believe there are any uncertain tax positions that require recognition of a tax liability in the Funds' financial statements.

7. SUBSEQUENT EVENTS

Management has evaluated the impact of all subsequent events on the Funds through the date the financial statements were available to be issued and has determined that there were no subsequent events requiring adjustment or disclosure in the financial statements.
