First Quarter
Consolidated Results
Three Months ended June 30, 2017
Announced on August 9, 2017

NISSIN FOODS HOLDINGS CO., LTD.

Stock Code : 2897

FY2018 Mgmt. Policy

Build firmer foundation for sustained growth, while targeting four-year consecutive record-high sales

Domestic: Enhancement of earning power and investment for future management base

Overseas: Significant increase in sales and increase in OP in each region based on “CUP NOODLES strategy.”

Consolidated: Growth achieved in both sales and profit (operating income, ordinary income, quarterly net income)
Adjusted operating income fell – Delayed expense recognition from Q1 to Q2 in FY2016

Domestic:

- Nissin Food Products Co., Ltd. achieved growth in sales although last year's success made it difficult to achieve growth this year (e.g. anniversary events for main brand products and launch of *CUP NOODLE RICH*). Operating income fell year on year, but in real terms, it achieved growth allowing for the delayed expense recognition for the corresponding quarter of last year.
- Myojo Foods Co., Ltd. suffered from sluggish sales but achieved higher profit, helped by productivity improvement for production operations.
- The chilled and frozen business achieved growth in sales and profit driven by the strong performance of the frozen food business.
- The confectionery and beverage business suffered a decline in profit, reflecting lower profit for Bonchi Co., Ltd. and higher depreciation expenses for Nissin York Co., Ltd., which was partially offset by strong sales and profit achieved by Nissin Cisco Co., Ltd.

Overseas:

- The Americas segment achieved sales growth helped by good business performance in the U.S. Operating income fell slightly.
- China segment achieved sales growth helped by a contribution from MCMS that was newly reflected in the consolidated accounts as well as good sales in mainland China. Operating income fell due to an increase in depreciation costs.
- Asia segment achieved sales growth, reflecting considerable sales growth in Indonesia, partially offset by a decline in sales in India following tax reforms. The level of deficit worsened slightly.
- EMEA segment saw strong business in Europe.

FY2018 1Q Results

Despite slight inconsistencies in the magnitude of sales and profit among business lines, the Company has made a good start to the new fiscal year on a consolidated basis. Keep up with the initial business plan as an absolute minimum target to achieve and aim for further profit growth.
