## 1. Summary of Business Results

### (1) Summary of Business Results for the Semi-annual Period

During the semi-annual period under review, the Japanese economy has been recovering moderately, with signs of a pickup in personal consumption and capital investment. While the employment and income environment is improving, corporate profits are stagnating due to the impact of US trade policy. Looking ahead, the impact of continued price increases on personal consumption through a decline in consumer confidence, among other factors, poses a risk of dragging down the economy, and this situation requires close monitoring.

Against this backdrop, the Group's net sales for the semi-annual period under review were 109,084 million yen (up 3.8% year-on-year), operating profit was 4,472 million yen (up 42.1% year-on-year), ordinary profit was 4,429 million yen (up 44.7% year-on-year), and profit attributable to owners of parent was 2,785 million yen (up 45.4% year-on-year).

The results of each segment are as follows.

#### [Corrugated Cardboard]

Domestic demand for corrugated packaging decreased due to poor fruit and vegetable harvests caused by the extreme heat, but overall remained roughly at the same level as the previous year.

In the Group's domestic corrugated cardboard sector, sales volume of processed foods and fruits and vegetables, the Company's mainstay products, were lower than in the same period of the previous year. In the overseas corrugated packaging sector, sales volume was lower than the same period last year due to the impact of customs policies, etc. in the United States. In terms of production, new air conditioning systems have been installed in major plants as a countermeasure against the extremely hot summer, and efforts are being made to improve the work environment and ensure the safety of employees.

On the other hand, domestic sales prices rose due to the effect of price revisions that were implemented in the previous fiscal year.

As a result, net sales in the Corrugated Cardboard segment were 62,974 million yen (up 4.9% year-on-year), and operating profit was 5,456 million yen (up 34.7% year-on-year).

#### [Housing]

The number of new housing starts in Japan has been declining since April compared to the same month last year.

In the Group's housing sector, Sweden House Co., Ltd. saw a decrease in the number of units sold and the number of units under contract compared to the same period last year. In addition, as of July 1, 2025, the Company merged with its subsidiary Sweden House Reform Co., Ltd. to create a one-stop service system for everything from new construction to remodeling. Tamazen Co., Ltd. saw an increase in the number of pre-built and custom-built homes sold compared to the same period last year.

As a result, net sales in the Housing segment were 22,718 million yen (up 0.4% year-on-year), and operating loss was 1,324 million yen (compared to an operating loss of 1,266 million yen in the same period of the previous fiscal year) due to the low ratio of net sales in the first half of the year to annual net sales.

#### [Transportation and Logistics]

In the logistics industry, domestic freight transport volume is predicted to decline for the fourth consecutive year. In the Group's transportation and logistics sector, handling volume increased due to the year-round operation of a storage logistics center for major retailers, which began operation last year, and the opening of a new base for beverage-related cargo. On the other hand, logistics costs increased significantly due to the impact of the 2024 logistics problem.

As a result, net sales in the Transportation and Logistics segment were 23,391 million yen (up 4.5% year-on-year) and operating profit was 795 million yen (down 6.0% year-on-year).

(2) Summary of Financial Condition for the Semi-annual Period

Total assets at the end of the semi-annual period under review decreased by current fiscal year were 212,767 million yen, up 5,942 million yen from the end of the previous fiscal year, due to increases in notes and accounts receivable - trade, and contract assets, inventories, and property, plant and equipment, etc., despite a decrease in cash and deposits, etc. Liabilities increased 3,099 million yen from the end of the previous fiscal year to 116,553 million yen due to an increase in notes and accounts payable – trade, borrowings and other current liabilities, etc. Net assets increased by 2,842 million yen from the end of the previous fiscal year to 96,214 million yen due to an increase in retained earnings, etc.

(3) Explanation of Consolidated Financial Results Forecast and Other Forward-Looking Statements

Based on the results of the semi-annual period under review, the consolidated earnings forecast for the full year has not been changed as we continue to strive to achieve the earnings forecast announced on May 8, 2025.
