Our positions "the creation of a sustainable and prosperous future" as a key priority and is committed to realizing a society that balances environmental responsibility with quality of life. The award-winning "Horizontal Recycling CUBITAINER" is an initiative to circulate used containers as resources. By leveraging this product technology, we will continue to contribute to the realization of a circular economy.

\*1 World Packaging Organisation (WPO) [WORLDSTAR AWARD](#)

The World Packaging Organisation (WPO) is an international packaging award. It aims to encourage the development of packaging technology, sustainability, and innovation, and to contribute to the development of international trade. Since 1970, the WPO has sponsored the WorldStar Awards, presenting numerous packaging awards from around the world. The WorldStar Competition is one of the main events of the WPO and is one of the most prestigious awards in packaging worldwide.

\*2 Horizontal recycling

This is a recycling method in which used products and production-process losses are reused as raw materials to manufacture the same type of product again. In this case, used “CUBITAINER” containers were recycled as raw materials and remolded into new “CUBITAINER” containers. To ensure proper management as a product made with recycled materials, it has been commercialized under the name “CUBITAINER SUR.”
